

This is a 3D pdf file. Click on the page, and you will probably be asked to "trust" this document. After choosing "trust this document", click anywhere on the page, and the model should load. Drag your cursor around, and you should be able to move the model.

--click and drag mouse to rotate/revolve the model  
--ctrl-left + drag mouse to move the model without rotation  
--ctrl-right + drag mouse to zoom the model  
--mouse scroll wheel also adjusts zoom

The menu bar can also be used for movement, plus other adjustments for lighting, cross-sectional views, transparency, and more.
